

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech., Civil	Shiv Nadar University, Delhi	7.7	2026
12th Grade	Omega International School ,CBSE	80	2022
10th Grade	Omega International School ,CBSE	90	2020

EXPERIENCE

- **Larsen & Tubro (L&T)**  May 2025-July 2025
Structural Design Intern Chennai, India
 - Worked as a Structural Engineering Intern with LT Heavy Civil Infrastructure: Metros Division, contributing to the Chennai Metro Phase II and underground stations of the Mumbai metro projects.
 - Gained exposure to underground metro construction including TBM launching shafts, tunnel segments, and retaining systems via site visits and detailed research.
 - Explored the application of machine learning to optimize and automate the placement schedule of ring segments in metro tunnels.
- **DBM Vircon**  May 2024-July 2024
Steel detailing Intern Chennai, India
 - Worked with the rebar detailing division for over 2 months on stadium and port projects using various international codes understanding the significance of 3D modelling, detailing and digital engineering.
 - Explored various teams in the company understanding roles of the technical and management sides of a detailing firm and the various challenges they tackle on a daily basis.
 - Teams in focus: Steel detailing, Rebar detailing, Industrial design, Invoicing.

PROJECTS [[CLICK FOR DETAILED PORTFOLIO](#)]

- **AutoCAD to BIM Interface** Aug 2025
Developing a python and dynamo based model to convert 2D AutoCAD models to 3D revit models.
 - Python, Machine Learning, Dynamo, AutoCAD, Revit
 - Progress: Have currently developed a model to translate 2D models to 3D and also generate some basic quantity scheduling in the process.
- **Construction Delay Prediction Model** Jan 2025
Developed a construction management tool using Machine Learning to predict delays during a project.
 - Python, Machine Learning
 - Result: Developed a preliminary model to predict construction delays with an accuracy of 70%.
- **IoT Sensor Network** Aug 2024
Worked on developing a real time wireless geotechnical monitoring sensor system using IoT.
 - Tools & technologies used: C, Arduino, IoT
 - Result: Established a pathway for data flow and tested various components and connections.

TECHNICAL SKILLS

- **Languages:** English, Hindi, Tamil, Telugu, French
- **Programming Languages:** C, Python, SQL
- **Tools:** Revit, AutoCAD, Robot, STAAD, Excel
- **Certification:** Construction Project Management, Columbia University

POSITIONS OF RESPONSIBILITY

- **Co-Lead Organizer,** TEDxShivNadarUniversity April 2024
- **Production Lead,** Cultural Committee Aug 2024

EXTRACURRICULARS

- **United Nation's Student Leadership Conference on Sustainable Development** Indian Delegate
- **India-Sri Lanka Youth exchange program** Indian Delegate
- **School football team**
